PROFESSIONAL SUMMARY

Software Development Engineer Intern at Amazon with experience in building scalable GenAI-powered applications using AWS, Java, and Python. Strong foundation in Data Structures & Algorithms, system design basics, and machine learning. Passionate about building high-performance backend systems and production-ready AI solutions for productbased companies.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript
Web: HTML, CSS, React
Cloud & DevOps: AWS (Lambda, VPC, Route53), AWS CDK (TypeScript)
AI/ML: Machine Learning, LangChain, FAISS, Transformers
Core CS: Data Structures & Algorithms, OOP, DBMS, Problem Solving

---

EXPERIENCE

Amazon | Software Development Engineer Intern | May 2025 – July 2025

- Built a GenAI-powered invoice validation chatbot using Amazon Bedrock Agents and Knowledge Bases, improving invoice error detection accuracy.
- Designed and deployed scalable AWS infrastructure using AWS CDK (TypeScript), integrating Lambda, VPC, and Route53.
- Implemented secure backend workflows and automated knowledge-base linkage for streamlined production deployment.
- Collaborated with cross-functional teams and participated in code reviews to maintain production-level code quality.

TechSaksham (Microsoft & SAP Initiative) | AI Intern

- Completed 4-week AI internship focused on machine learning fundamentals and realworld AI applications.
- Assisted in managing AI learning modules and mentoring students under Edunet Foundation.

PROJECTS

PDF QA Agent (RAG-based Generative AI System)

Developed a document-based Question Answering system using RAG architecture with chunking, embeddings, and vector search.

- Tech: Python, Streamlit, LangChain, FAISS, HuggingFace/OpenAI APIs

Face Mask Detection (Transfer Learning – MobileNetV2)

Built real-time face mask detection system using transfer learning and OpenCV for live webcam inference.

- Tech: TensorFlow, Keras, OpenCV, NumPy, Scikit-learn

Spotify Clone (Frontend Web Application)

Developed responsive music player with dynamic UI updates and interactive playback controls.

- Tech: HTML, CSS, JavaScript

AI Classroom Voice Analyzer

Face Mask Detection (Transfer Learning – MobileNetV2)
Built a real-time face mask detection system using transfer learning with MobileNetV2 and implemented live webcam inference using OpenCV.
• Tech: TensorFlow, Keras, OpenCV, NumPy, Scikit-learn

EDUCATION

JSS Academy of Technical Education, Noida

B.Tech in Computer Science (Data Science) | Expected Jan 2027 | GPA: 8.3/10

Brilliant Public School, Aligarh

Senior Secondary – 95%
